Re: Judges use my book.

Dear Fellow Attorney:

One of the nice things about having written a criminal law book for the last 25 years is that judges have it on their bench and prosecutors have it on their shelf. So, when I am in a bench conference or I want to make a point in a prosecutor's office, I can refer to an applicable section of my book.

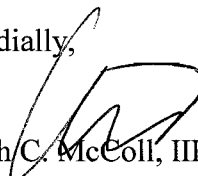

When Judge Erisman died, the publishers asked me to take over writing his book, and I have written it since 1983 (flyer enclosed). After a few years of writing it, I asked my partner to join me as a co-author, which he did; he also co-authored with federal District Judge, Ed Kinkeade, another criminal law book published by Thomson West.

McColl & McColloch has always taken a rigorous, academic and creative approach toward criminal law. This is a necessity because the facts in a criminal case are often not good, so knowing the latest legal developments and using them creatively is essential to "shape" the litigation.

Whether I am defending a lawyer, a doctor or a businessman in a white-collar crime case or their offspring charged with possession of cocaine or a DWI, the first question is the same: Is there anything that is possibly a legal obstacle to some part of the prosecution's case?

I am also available for consultation in *potential* criminal cases. For my professional information, including information about my extensive experience in white-collar crime cases, see www.mcmclaw.com.

Cordially,

Arch C. McColl, III
